DETAILED ACTION

Examiner's Amendment.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Claims 23-24, drawn to an active-matrix-addressed liquid crystal display device (fig. 13), classified in class 257, and subclass 350. Therefore, separate search and examination would be required. Applicants can modify these claims to become independent claims and have the right to file a divisional application covering the subject matter of the non-elected claims.

Cancel claims 11-13 and 21-24.

Reason for allowance

The following is an examiner's statement of reason for allowance: None of the references of record teaches or suggests the claimed Thin-Film Transistor, Method for Fabricating The Same, and Liquid Crystal Display Device having at least two lightly doped regions with different carrier concentrations between a first channel and the adjacent S/D, and at least two additional lightly doped regions with different carrier concentrations provided between the second channel and the adjacent S/D.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
